

Bring Your Legacy Documents into the 21st Century!

Xenos d2e Platform software transforms documents from their printed formats into electronic formats, supporting both e-business and print strategies.

Banking	Brokerage	Credit Unions
Healthcare	Insurance	Manufacturing
Pharmaceutical	Post Offices	Retail
Service Bureaus	Telecommunications	Utilities

"Xenos really understood the issues we were facing and our objectives. The company responded quickly to our needs and helped us deliver complex benefits statements on the Web in line with our eCRM strategy."

George Patchen, Senior Software Advisor, Guardian Life Insurance Company (Insurance), United States

Xenos d2e Platform

A robust, scalable, production solution handling millions of pages daily.

Runs on most popular operating systems:

- IBM Z/OS, MVS, OS/390
- IBM AIX
- Sun Solaris
- HP UX
- Linux
- Windows 2000, NT

Processes these printstreams:

- IBM AFP
- Xerox Metacode/DJDE
- Xerox XES
- HP PCL
- TIFF
- Line and ASCII data
- Text data

Generates Internet and print output:

- Adobe PDF
- HTML/CSS
- XML
- Data merged into templates
- IBM AFP
- Xerox Metacode
- HP PCL 5
- PostScript 2
- TIFF

d2e Developer Studio

- Windows GUI
- Rapid creation and maintenance of d2e applications

Solutions for Today and Tomorrow

Xenos d2e software is not limited to a single application or to a single document type. You can start with a departmental level application with one document type and expand d2e Platform into your entire enterprise as business requirements evolve. The breadth of d2e allows organizations to solve today's business challenges while providing a solid foundation to add solutions for tomorrow's requirements.

Xenos d2e Platform Advanced Capabilities

Intelligent Document Control

Powerful, Flexible, Easy-to-Use Data Extraction, Document Separation

- Extract transaction information such as amount(s) and due date(s) from bills.
- Extract customer identification to create an index.
- Separate large-volume print stream files into individual documents. The filename of each document can be created using information extracted from the print stream.

Easy to Interface and Integrate with other Applications

- Extract required data from bills; generate XML records and load into an electronic billing application database.
- Generate documents and their indexes to load into an archiving system.
- Create electronic versions of documents for attachments in e-mail delivery applications.

Create Multiple Outputs in a Single Processing Pass

- Generate web formats (PDF, HTML/CSS) and archive formats (AFP, TIFF) in a single pass.
- Generate web (PDF and HTML/CSS) or print formats based on customer choices. Distribute printing to departmental printers.

Personalize Each Customer's Communications

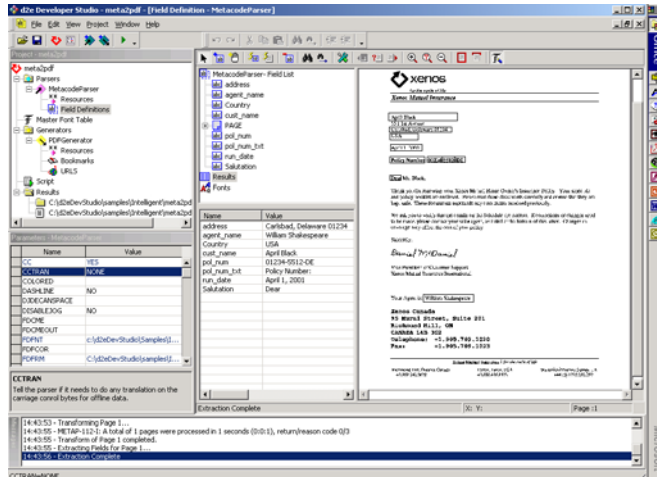

- Treat each customer uniquely, based on your customer profile. Extract customer account number, use as index to access and include personalized, 1 to 1 marketing messages.

Flexible and Powerful Business Rules

- Meet today's requirements as well as tomorrow's. With a scripting language and powerful document manipulation functions, you can preserve your investment by using today's d2e applications as bases for tomorrow's requirements.

Developer Studio for Rapid Application Development

Developer Studio is a Windows GUI environment for rapid d2e Platform application development.

- Quick to learn and use
- Font Correlation
- Document Preview
- Bookmark creation
- Wizards
- URL creation
- Drag and drop scripting
- Graphical definition of data extraction fields
- Parameter validation
- Hex Viewer
- Automated script generation
- Build, test, package and deploy

Let us show you how you can go from decision to production in 30 days.
