

# PRO INKJET EXPRESS

Implement or migrate your Inkjet workflow quickly and profitably

## OVERVIEW

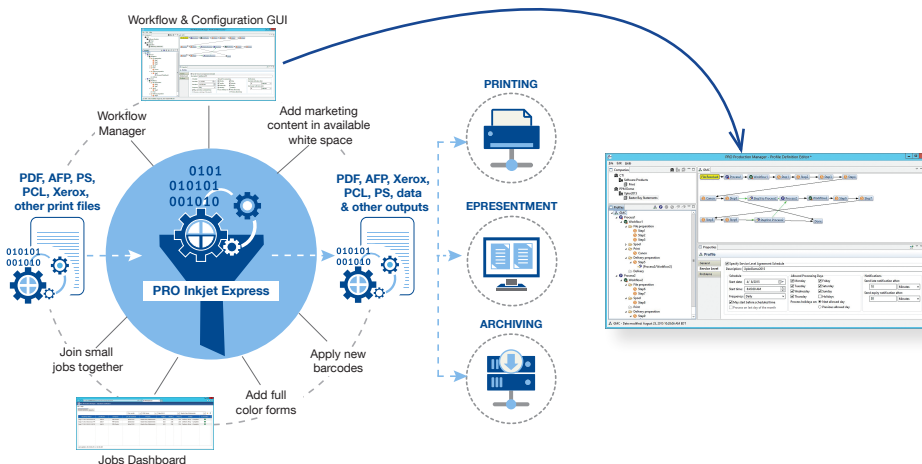

PRO Inkjet Express is a flexible solution that gives you the tools you need to easily implement and manage an automated production workflow for your Inkjet presses. It is unique in allowing you to migrate and modify existing workflows to full color inkjet without the need to reengineer existing processes or recompose existing print streams. With PRO Inkjet Express, you can quickly take advantage of the features and capabilities of your full color inkjet press, leveraging functionality that will reduce your costs, while offering your customers more value.

### With PRO Inkjet Express You Can

- Accelerate ROI for high speed inkjet printers and finishing technology.
- Reduce postage costs.
- Expedite migrating to inkjet presses by quickly setting up the workflows needed for your production, post-production and mailing requirements.
- Take advantage of an easy-to-use graphical interface, reducing or eliminating the need for IT involvement.
- Quickly migrate existing jobs to new inkjet presses in order to get print volumes up to targets fast, increasing your ROI on the equipment – without having to start from scratch and recompose your existing print stream.
- Replace pre-printed shells with inline color, and selectively add color to your documents, saving stationery related costs and improving customer communications.

### What does PRO Inkjet Express do?

- Combine small jobs into large runs to ensure that your inkjet press will run optimally and profitably
- Segment large jobs for rolls, inserters, and mailing processes
- Change output formats of existing jobs without recomposing print streams
- Adjust positioning of names and addresses to fit standardized envelopes
- Add IMb barcodes, take advantage of householding and use color for significant postage cost savings
- Replace pre-printed shells with inline color, and add color to existing files to save money and enrich customer communications
- Place multiple documents in one envelope to save money

## An example of what PRO Inkjet Express can do:

When they decided to purchase new Inkjet Presses, a print service provider in the U.S. identified a number of requirements and goals that would determine how quickly they would realize a return on their investment. They knew that they would need to adapt their workflow, and recognized that doing this efficiently would be a key factor in profitability. They wanted to move most of their print volume over to the new equipment as quickly as possible, with minimal disruption to existing processes.

By planning and testing a modified workflow *before* finalizing their press purchase, the PSP was able to hit the ground running once the presses were in place. In choosing Crawford Technologies, they were able to take advantage of the fact that the solution supported virtually all inkjet vendors' presses. This allowed them to consider a wide range of hardware offerings, while taking advantage of cooperative business and technical partnerships to implement a cohesive end-to-end workflow.

## Some quick technical facts:

PRO Inkjet Express runs on all major operating systems:

- Windows
- Linux
- AIX
- HP-UX
- Solaris

PRO Inkjet Express supports all major print streams:

- AFP (Line data, mixed mode & fully composed)
- Xerox (LCDS & Metacode)
- PCL
- PostScript®
- PDF
- HTML5
- Line data

*“We saved thousands of dollars in postage costs alone thanks to the tools that PRO Inkjet Express gives us — allowing us to quickly realize ROI on our total investment.”*
